# COLORWINGS

THE BRAND OF QUALITY PAINTS

[www.colorwings.co.in](http://www.colorwings.co.in)

# HD STRAINER

HD Color wings Universal strainers,, are used to adjust the color of paints, enamels, and other coatings. They are typically added to a base paint to achieve a desired shade.

# HI-GLOSS WOOD PRIMER

ColorWings Hi-Gloss Wood primer is a preparatory coating applied to wood surfaces before painting to enhance durability, improve paint adhesion, and protect the wood

# HI-GLOSS RED OXIDE METEL PRIMER

Color Wings Hi-Gloss Red oxide primer is a rust-preventative coating designed for metal surfaces, particularly ferrous metals (containing iron), to protect them from corrosion and prepare them for topcoats.

## RED OXIDE PRIMER / WOOD PRIMER GRADE-2

# HI-GLOSS ENAMEL (GOLD SERIES)

Color Wings Maxx Enamel paint is a type of paint known for its hard, glossy, and durable finish. It's often used on surfaces that need to withstand wear and tear, both indoors and outdoors. Enamel paint typically has a resin or varnish base, making it resistant to fading, chipping, and moisture.

# NC-THINNER

\*

**LD THINNER**

**CG-01 / CW-02**

# WALL PUTTY

**Color Wings Wall putty** is a white cement-based powder used to prepare interior walls for painting. It's applied to fill in minor imperfections like cracks, dents, and holes, creating a smooth, even surface for better paint adhesion and a more professional finish.

# BLACK JAPAN

Black Japan paint is a durable, glossy black coating traditionally used for decorative purposes on wood, metal, and masonry surfaces

# TARPIN OIL

**Color Wings Tarpin oil, also known as turpentine oil, T-oil/ Paint Thinner primarily used in the painting industry as a thinner for oil-based paints, varnishes, and lacquers**

# CW MAXX DISTEMPER

Color Wings Maxx Distemper paint is a traditional, water-based paint primarily composed of chalk, lime, and a binding agent, often animal glue. It dries to a matte finish and is known for its breathability, making it suitable for older homes. However, it can be prone to chalking and flaking, especially in damp environments.

# CW ECO-MAXX DISTEMPER

Color Wings ECO-Maxx Distemper paint is a traditional, water-based paint primarily composed of chalk, lime, and a binding agent, often animal glue

## CW MAXX INTERIOR PRIMER

ColorWings Maxx Interior painting is the process of applying paint to the inside surfaces of a building, like walls, ceilings, and trim, to enhance both aesthetics and protection. It involves surface preparation, choosing the right paint type and finish, and applying multiple coats for durability.

# CW MAXX DUAL 2-IN-1 PRIMER

Color Wings Maxx Dual primer(2-in-1), , also known as a dual-purpose primer, is a type of paint primer designed for both interior and exterior use, offering enhanced adhesion and sealing properties for various surfaces. It acts as an undercoat, preparing the surface for the topcoat (emulsion paint) by providing a strong bond

## CW MAXX EMULSION

Color Wings Maxx Emulsion paint is a water-based paint that utilizes a mixture of pigments, binders, and additives to create a durable and versatile coating.

## PUTTY BOOSTER

**Color Wings Putty Boost**, is an additive for powder putty. Distemper/Cement Paint/Emulsion, designed to improve its workability and performance of product and increase the strength of products

# COATED ABRASIVE

**Color Wings Abrasive coatings** are materials with a rough surface used to remove material from a substrate through abrasion

# COLOR WINGS PAINTING TOOLS

**Color Wings painting tools** Painting tools encompass a wide variety of implements used in the application and preparation of paint, as well as for cleanup. These tools include brushes, rollers, paint trays, drop cloths, painter's tape, and more, each serving a specific purpose to ensure efficient and high-quality painting.
